Summer 2024

Making A Splash!

Hot summer days are here and Nick, Penny, Bev, and Daniel are too hot! They asked their parents if they would take them to the pool so they can cool off. They said yes, but they remembered the pool sold snow cones and they wanted to make sure they got some!

They all counted their money to see what they had saved up. Each person had \$5 in their piggy banks. One snow cone costs \$7 and they each want to get their own.

How much more money do they each need so they can each get a snow cone?

$\$7$ (cost of one snow cone) - $\$5$ (in their piggy banks) = $\$$ _____

They decided to walk dogs for their neighbors to make enough money! They went around asking their neighbors if they could walk their dogs for \$2 each. By the end of the day, they had each walked 6 dogs! How much money did Nick, Penny, Bev, and Daniel make walking dogs?

$\$2$ (per dog) x 6 (dogs walked) = $\$$ _____ (amount of money made)

They were so happy they made more than enough money to get snow cones at the pool! If each of them buys one, how much money will they have left to put into their Youth Share Certificate account?

$\$5$ (in their piggy banks) + $\$$ _____ (amount of money made) = $\$$ _____

$\$$ _____ (total amount) - $\$7$ (snow cone) = $\$$ _____ (leftover)

The crew went to the pool to splash around, swim about, and dive for pool toys. They slurped up every last bit of their snow cones as the sun began to set that summer day.
